2. OBTAINING HELP

Looking for help? Check our FAQ on our website

https://scelliuspaiement.labanquepostale.fr/doc/en-EN/faq/sitemap.html

For any technical inquiries or if you need any help, contact *technical support*.

In view of facilitating the processing of your requests, please specify your shop ID (an 8-digit number) in your query

This information is available in the "registration of your shop" e-mail or in the Merchant Back Office (Settings > Shop > Configuration).

ancv

To continue its digital transformation, the Agence Nationale des Chèques-Vacances offers a new electronic payment method: Chèque-Vacances Connect.

Chèque-Vacances Connect allows beneficiaries to use their Holiday Vouchers (chèques vacances) for payments to all tourism and culture professionals affiliated to the ANCV network, such as hotels, restaurants, leisure parks and transport companies.

Using an application downloaded to their smartphone, the beneficiary can view available offers, check their balance and make purchases quickly and directly, via automatic terminals or on the Internet.

During payment validation via the application, beneficiaries have the possibility to use all their balance to pay for their purchase.

However, if the balance is insufficient or if they wish to pay only part of the amount using holiday vouchers, the remaining amount will need to be paid by credit card.

For the Merchant, this solution presents several advantages, such as enhanced visibility via the application for accessing a wider customer base, as well as simplified and faster refunds.

	Supported currencies	• EUR
	Supported countries	• France
		 It is recommended to provide a different payment button for each payment method (1 button for CB payment, 1 button for the CVCO payment, 1 button for E_CV payment, etc.) on the merchant website.
		 For the CVCO payment method, display a logo and text explaining that these are CVCO and not eCV.
	Additional	 The minimum amount is €20.
0	information	The order number is optional.
		Manual validation is not supported.
		 Deferred payments are not allowed to exceed 3 days.
		Partial refund is not supported.
		Partial cancellation is not supported.
٥	Additional information	 For the CVCO payment method, display a logo and text explaining that these are CVCO and not eCV. The minimum amount is €20. The order number is optional. Manual validation is not supported. Deferred payments are not allowed to exceed 3 days. Partial refund is not supported. Partial cancellation is not supported.

5. PREREQUISITES

To offer Chèque-Vacances Connect payment on your merchant website, you must:

- select the "Payment via Chèque-Vacances Connect" option,
- sign an acceptance agreement with ANCV,
- contact the E-Banking Merchant Support Service to declare the "Shop Id" provided by ANCV.

In order to simplify the customer journey, increase the transformation rate and thus reduce the number of abandoned orders, it is recommended to:

- select the payment method on the merchant website,
- generate a payment button for each type of payment method.

Example of payment method selection:

Select Payment Method:

 Chèque-Vacances Connect 	
 e-Chèque-Vacances 	ancv
O Credit/Debit Card	👥 VISA 🌒

7. PAYMENT PROCESS

The diagram below presents the exchange process from the point of view of the buyer.

The buyer pays the whole amount with Chèques-Vacances :

The buyer chooses to pay only a part of the amount with Chèques-Vacances (or the balance is not sufficient):

Note:

If the amount to be paid is lower than €20, the payment page will not offer the Chèque-Vacances Connect payment method.

If the amount to be paid is greater than ≤ 20 but the balance on the ANCV account is less than ≤ 20 , the buyer can use the balance on the account and complete it with another payment method.

However, the payment will be refused due to "insufficient funds" if the shop does not have a contract allowing the payment of the remaining amount.

The interaction with the payment gateway is described in the *Hosted Payment Page Implementation Guide*, available in our online documentation archive.

The merchant website and the payment gateway interact by exchanging data.

To create a payment, this data is sent in an HTML form via the buyer's browser.

At the end of the payment, the result is transmitted to the merchant website in two ways:

- automatically by means of notifications called Instant Notification URLs (also known as IPN or Instant Payment Notification).
- Via the browser when the buyer clicks the button to return to the merchant website.

To guarantee the security of the exchange, the data is signed with a key known only to the merchant and the payment gateway.

There are several types of notifications provided in the Merchant Back Office.

- Instant Payment Notification URL call
- E-mail sent to the merchant
- E-mail sent to the buyer
- SMS sent to the merchant
- SMS sent to the buyer

They allow to manage the events (payment accepted, payment abandoned by the buyer, payment canceled by the merchant, payment validated by the merchant, etc.) that will trigger a notification sent to the merchant website, the merchant or the buyer.

The notifications of Instant Payment Notification URL call type are very important as they represent the only reliable way for the merchant website to obtain the payment result.

If the payment gateway is unable to access the URL of your page, an e-mail will be sent to the shop administrator.

It contains:

- The HTTP code of the encountered error,
- Parts of error analysis,
- Its consequences,
- Instructions via the Merchant Back Office to resend the request to the previously defined URL.

To access notification rule management:

Go to the following menu: Settings > Notification rules.

🚯 Insta	ant Payment Notification	E-	mail sent to the merchant 🛛 🖂 E-mail sent to the buyer
	Enabled	Ŧ	Reference
×			Instant Payment Notification URL on batch authorization
v			Instant Payment Notification URL at the end of the payment
×			Instant Payment Notification URL on batch change
×			Instant Payment Notification URL on cancellation
×			Instant Payment Notification URL on an operation coming from the Back Office

9.1. Setting up the Instant Payment Notification

This rule allows to notify the merchant website in the following cases:

- Payment accepted
- Payment refused
- Payment canceled or abandoned by the buyer

This notification is required to communicate the result of a payment request.

It will inform the merchant website of the payment result even if your client has not clicked the "Return to the shop" button.

- 1. Right-click Instant Payment Notification URL at the end of the payment.
- 2. Select Manage the rule.
- Enter the E-mail address(es) to notify in case of failure field in the General settings section.
 To specify several e-mail addresses, separate them with a semi-colon.
- 4. Check the box Automatic retry in case of failure if you wish to authorize the gateway to automatically resend the notification in case of a failure (can be done up to 4 times).
- 5. In the **Instant Payment Notification URL of the API form V1, V2** section, specify the URL of your page in the fields **URL to notify in TEST mode** and **URL to notify in PRODUCTION mode** if you wish to receive notifications in the API form format.
- 6. Save the changes.

This rule allows to notify the merchant website if one of the following cases occur **during the complementary payment**:

- When the buyer abandons/cancels a payment via the **Cancel and return to shop** button.
- When the buyer has not completed the payment and the payment session has expired.

The maximum length of a payment session is 10 minutes.

This rule is **disabled by default**.

- 1. Right-click Instant Payment Notification URL on cancellation.
- 2. Select Manage the rule.
- Enter the E-mail address(es) to notify in case of failure field in the General settings section.
 To specify several e-mail addresses, separate them with a semi-colon.
- 4. Check the box Automatic retry in case of failure if you wish to authorize the gateway to automatically resend the notification in case of a failure (can be done up to 4 times).
- 5. In the **Instant Payment Notification URL of the API form V1, V2** section, specify the URL of your page in the fields **URL to notify in TEST mode** and **URL to notify in PRODUCTION mode** if you wish to receive notifications in the API form format.
- 6. Save the changes.
- 7. Enable the rule by right-clicking Instant Payment Notification URL on cancellation and select Enable the rule.

To generate a payment request, you must create an HTML form as follows:

```
<form method="POST" action="https://scelliuspaiement.labanquepostale.fr/vads-payment/">
<input type="hidden" name="parameter1" value="value1" />
<input type="hidden" name="parameter2" value="value2" />
<input type="hidden" name="parameter3" value="value3" />
<input type="hidden" name="signature" value="signature"/>
<input type="submit" name="pay" value="Pay"/>
</form>
```

It contains:

- The following technical elements:
 - The <form> and </form> tags that allow to create an HTML form.
 - The method="POST" attribute that defines the method used for sending data.
 - The action="https://scelliuspaiement.labanquepostale.fr/vads-payment/" attribute that defines
 where to send the form data.
- Form data:
 - The shop ID.
 - Information about the payment depending on the use case.
 - Additional information depending on your needs.
 - The signature that ensures the integrity of the form.

This data is added to the form by using the <input> tag:

<input type="hidden" name="parameter1" value="value1" />

For setting the name and value attributes, see the **Data dictionary** chapter also available in the online document archive.

All the data in the form must be encoded in UTF-8.

This will allow for the special characters (accents, punctuation marks, etc.) to be correctly interpreted by the payment gateway. Otherwise, the signature will be computed incorrectly and the form will be rejected.

• The Pay button for submitting the data:

<input type="submit" name="pay" value="Pay"/>

Different use cases are presented in the chapters below. This information will allow you to adapt your payment form to your needs.

Notation	Description
а	Alphabetic characters (from 'A' to 'Z' and from 'a' to 'z')
n	Numeric characters
s	Special characters
an	Alphanumeric characters
ans	Alphanumeric and special characters (except '<' and '>')
3	Fixed length of 3 characters
12	Variable length up to 12 characters
json	JavaScript Object Notation. Object containing key/value pairs separated by commas. It starts with a left brace "1" and ends with a right brace "1". Each key / value pair contains the name of the key between double-quotes followed by " . ", followed by a value. The name of the key must be alphanumeric. The value can be: • a character string (in this case it must be framed by double quotes) • a number • an object • a table • a boolean
	Example: {"name1".45 "name2"."value2" "name3".false1
bool	Boolean. Can be populated with the true or false value.
enum	Characterizes a field with a complete list of values.
	The list of possible values is given in the field definition.
Enum list	List of values separated by a ";". The list of possible values is given in the field definition. Example: vads_payment_cards=VISA; MASTERCARD
map	List of key / value pairs separated by a ";". Each key / value pair contains the name of the key followed by "=", followed by a value. The value can be:
	a chain of characters
	• a boolean
	• a json object
	an xml object
	The list of possible values for each key/value pair is provided in the field definition. Example: vads_theme_config=SIMPLIFIED_DISPLAY=true;RESPONSIVE_MODEL=Model_1

The following table lists the different formats that you can encounter when building your form.

1. Use all the fields presented in the table below to create your payment form.

Field name	Description	Format	Value
vads_payment_cards	Allows to force the card type to be used. ANCV recommends to provide a different payment button for each payment method on the merchant website. It is recommended not to leave the field empty.	enum	CVCO to directly call the Chèque-Vacances Connect payment button.
vads_order_id	Order ID. Optional field. Can contain uppercase or lowercase characters, numbers or hyphens ([A- Z] [a-z], 0-9, _, -).	ans64	E.g.: CDE-fr-04_2020
vads_page_action	Action to perform	enum	PAYMENT
vads_amount	Payment amount in the smallest currency unit(cents for euro).	n12	E.g.: 4525 for EUR 45.25
vads_ctx_mode	Mode of interaction with the payment gateway	enum	TEST orPRODUCTION
vads_currency	Numeric currency code to be used for the payment, in compliance with the ISO 4217 standard (numeric code).	n3	Possible values:978 (EUR)
vads_capture_delay	Delay before capture in the bank. Any capture delay that exceeds 3 days will be ignored and reduced to 3 days.	n3	E.g.: 0
vads_action_mode	Acquisition mode for payment method data	enum	INTERACTIVE
vads_payment_confi	Payment type	enum	SINGLE
vads_site_id	Shop ID	n8	E.g.: 12345678
vads_trans_date	Date and time of the payment form in UTC format	n14	Respect the YYYYMMDDHHMMSS format E.g.: 20200101130025
vads_trans_id	Transaction number. Must be unique within the same day (from 00:00:00 UTC to 23:59:59 UTC). Warning: this field is not case sensitive.	an6	E.g.: xrT15p
vads_version	Version of the exchange protocol with the payment gateway	enum	V2

2. Add the optional fields described in the following chapters according to your requirements.

3. Compute the value of the **signature** field using all the fields of your form that start with **vads** (see chapter **Computing the signature** of the *Implementation Guide Hosted Payment Page* available on our website).

The Merchant can specify the buyer's billing details (e-mail address, title, phone number, etc.). This information will be used to create the invoice.

All the data transmitted via the payment form can be viewed in the transaction details in the Merchant Back Office (**Buyer** tab).

Use optional fields according to your requirements. *These fields will be returned with the response and will include the value transmitted in the form.*

Field name	Description	Format	Value
vads_cust_email	Buyer's e-mail address	ans150	E.g.: abc@example.com
vads_cust_id	Buyer reference on the merchant website	an63	E.g.: C2383333540
vads_cust_national_id	National identifier	ans255	E.g.: 940992310285
vads_cust_title	Buyer's title	an63	E.g.: M
vads_cust_status	Status	enum	PRIVATE : for a private individual COMPANY : for a company
vads_cust_first_name	First name	ans63	E.g.: Laurent
vads_cust_last_name	Last name	ans63	E.g.: Durant
vads_cust_legal_name	Buyer's legal name	an100	E.g.: D. & Cie
vads_cust_phone	Phone number	an32	E.g.: 0467330222
vads_cust_cell_phone	Cell phone number	an32	E.g.: 06 12 34 56 78
vads_cust_address_number Street number		ans64	E.g.: 109
vads_cust_address	Postal address		E.g.: Rue de l'Innovation
vads_cust_address2	s_cust_address2 Address line 2		E.g.:
vads_cust_district	District		E.g.: Downtown
vads_cust_zip Zip code		an64	E.g.: 31670
vads_cust_city	City		E.g.: Labège
vads_cust_state	State / Region	ans127	E.g.: Occitanie
vads_cust_country	Country code in compliance with the ISO 3166 alpha-2 standard	a2	E.g.: "FR" for France, "PF" for French Polynesia, "NC" for New Caledonia, "US" for the United States.

Note

vads_cust_phone and vads_cust_cell_phone fields accept all formats:

Examples:

- 0123456789
- +33123456789
- 0033123456789
- (00.571) 638.14.00
- 40 41 42 42

10.3. Transmitting shipping details

The merchant can transmit the buyer's shipping details (e-mail address, title, phone number etc.).

This information can be found in the transaction details in the Merchant Back Office (Shipping tab).

Use optional fields according to your requirements. *These fields will be returned with the response and will include the value transmitted in the form.*

Field name	Description	Format	Value
vads_ship_to_city	City	an128	E.g.: Bordeaux
vads_ship_to_country	Country code in compliance with the ISO 3166 standard (required for triggering one or more actions if the Shipping country control profile is enabled).	a2	E.g.: FR
vads_ship_to_district	District	ans127	E.g.: La Bastide
vads_ship_to_first_name	First name	ans63	E.g.: Albert
vads_ship_to_last_name	Last name	ans63	E.g.: Durant
vads_ship_to_legal_name	Legal name	an100	E.g.: D. & Cie
vads_ship_to_phone_num	Phone number	ans32	E.g.: 0460030288
vads_ship_to_state	State / Region	ans127	E.g.: Nouvelle Aquitaine
vads_ship_to_status	Allows to specify the type of the shipping address.	enum	PRIVATE : for shipping to a private individual COMPANY : for shipping to a company
vads_ship_to_street_number	Street number	ans64	E.g.: 2
vads_ship_to_street	Postal address	ans255	E.g.: Rue Sainte Catherine
vads_ship_to_street2 Address line 2		ans255	
vads_ship_to_zip	Zip code	an64	E.g.: 33000

The merchant can indicate in their payment form if they wish to transfer the order details (order reference, description, shopping cart contents, etc.).

This information can be found in the transaction details in the Merchant Back Office (Shopping cart tab).

1. Use optional fields according to your requirements. These fields will be returned with the response and will include the value transmitted in the form.

Field name	Description	Format	Value
vads_order_info	Additional order info	ans255	E.g.: Door code 3125
vads_order_info2	Additional order info	ans255	E.g.: No elevator
vads_order_info3	Additional order info	ans255	E.g.: Express
vads_nb_products	Number of items in the cart	n12	E.g.: 2
vads_product_ext_idN	Product barcode on the merchant website. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).		E.g.: vads_product_ext_id0 = "0123654789123654789" vads_product_ext_id1 = "0223654789123654789"
vads_product_labelN	Item name. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).	ans255	E.g.: vads_product_label0 = "Dated 3 days stay" vads_product_label1 = "Private concert"
vads_product_amountN	Item amount expressed in the smallest currency unit. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).	n12	E.g.: vads_product_amount0 = "32150" vads_product_amount1 = "10700"
vads_product_typeN	Item type. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).	enum	E.g.: vads_product_type0 = "TRAVEL" vads_product_type1 = "ENTERTAINMENT"
vads_product_refN	Item reference. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).	an64	E.g.: vads_product_ref0 = "1002127784" vads_product_ref1 = "1002127693"
vads_product_qtyN	Item quantity. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).	n12	E.g.: vads_product_qty0 = "1" vads_product_qty1 = "1"

Populate the vads_nb_products field with the number of items contained in the cart. Note:

This field becomes mandatory for the shopping cart to be taken into account.

When it is populated, the **Shopping cart** tab becomes available in the transaction details in the Merchant Back Office.

However, if the other fields that start with **vads_product_** are not populated, the tab will not include any information. For this reason, when populating the **vads_nb_products** field, it <u>becomes mandatory</u> to populate the other fields that start with **vads_product_**.

3. Populate the vads_product_amountN field with the amount for the items in the cart, using the smallest currency unit.

N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).

4. Populate vads_product_typeN with the value corresponding to the item type.

N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).

Value	Description
FOOD_AND_GROCERY	Food and grocery
AUTOMOTIVE	Cars / Moto
ENTERTAINMENT	Entertainment / Culture
HOME_AND_GARDEN	Home / Gardening
HOME_APPLIANCE	Household appliances
AUCTION_AND_GROUP_BUYING	Auctions / Group purchasing
FLOWERS_AND_GIFTS	Flowers / Presents
COMPUTER_AND_SOFTWARE	Computers / Software
HEALTH_AND_BEAUTY	Health / Beauty
SERVICE_FOR_INDIVIDUAL	Services for individuals
SERVICE_FOR_BUSINESS	Services for companies
SPORTS	Sports
CLOTHING_AND_ACCESSORIES	Clothes / Accessories
TRAVEL	Travel
HOME_AUDIO_PHOTO_VIDEO	Audio / Photo / Video
TELEPHONY	Telephony

- Populate vads_product_labelN with the name of each item contained in the cart.
 N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).
- 6. Populate vads_product_qtyN with the quantity of each item contained in the cart. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).
- **7.** Populate **vads_product_refN** with the reference of each item contained in the cart. N corresponds to the index of the item (0 for the first one, 1 for the second one, etc.).
- 8. Check the value of the vads_amount field. It must correspond to the total amount of the order.

The merchant can transmit specific information in the payment form. For example, the merchant can add information in the payment confirmation e-mail that he or she will receive.

This information will be visible in the Back Office, in transaction details (**Extras** tab), and will also be returned in the notification URL.

The name must begin with **vads_ext_info** to be taken into account.

vads_ext_info_name=value

Where:

• name

Allows to define the name of the field.

• value

Allows to define the value of the field.

There are no restrictions to the number of specific fields that can be created.

These fields will be returned in the response and will include the value transmitted in the form.

Examples:

```
<form method="POST" action="https://scelliuspaiement.labanquepostale.fr/vads-payment/">
[...]
<input type="hidden" name="vads_ext_info_Arrival_Date" value="22/07/2020" />
<input type="hidden" name="vads_ext_info_Nbparture_Date" value="24/07/2020" />
<input type="hidden" name="vads_ext_info_Nb_Adults" value="1" />
<input type="hidden" name="vads_ext_info_Nb_Child" value="1" />
[...]
<input type="submit" name="pay" value="Pay"/>
</form>
```

The buyer will be able to finalize his/her purchase once he/she is redirected to the payment page.

The buyer's browser must transmit the payment form data.

11.1. Redirecting the buyer to the payment page

The URL of the payment gateway is:

https://scelliuspaiement.labanquepostale.fr/vads-payment/

Example of parameters sent to the payment gateway:

This example shows all the fields that can be sent if this information is available in your information system. Depending on your business needs, certain fields may not be sent.

<form r<="" th=""><th>method="POST" a</th><th>action="https://scelliuspaiement.labanquepostale.fr/vads-payment/"></th></form>	method="POST" a	action="https://scelliuspaiement.labanquepostale.fr/vads-payment/">

11.2. Processing errors

If the payment gateway detects an error while receiving the form, an error message will appear and the buyer will not be able to proceed to the payment.

In TEST mode

The message indicates the source of the error and provides a link to the error code description to help you fix it.

In PRODUCTION mode

The message simply indicates to the buyer that a technical problem has occurred.

In both cases the merchant receives a notification e-mail.

It contains:

- the source of the error,
- a link to possible causes to facilitate its analysis,
- all the fields of the form.

A description of the error codes with their possible causes is available on our website

https://scelliuspaiement.labanquepostale.fr/doc/fr-FR/error-code/error-00.html

The analysis of the payment result is described in the *Hosted Payment Page Implementation Guide* available in our online documentation archive (*https://scelliuspaiement.labanquepostale.fr/doc/fr-FR/*).

This document only describes the steps for processing data relative to the response of a payment made with Chèque-Vacances Connect.

12.1. Processing the response data

Here is an example of analysis to guide you through processing the response data.

1. Identify the order by retrieving the value of the vads_order_id field.

Make sure that the order status has not been updated yet.

- 2. Retrieve the payment reference transmitted in the vads_trans_id field.
- 3. Retrieve the value of the vads_trans_date field to identify the payment date.
- 4. Retrieve the used amount and currency. To do this, retrieve the values of the following fields:

Field name	Description	
vads_amount	Payment amount in the smallest currency unit.	
vads_currency	Numeric code of the currency used for the payment.	

5. Retrieve all the order, buyer and shipping details.

These details will be provided in the response only of they have been transmitted in the payment form.

Their values are identical to the ones submitted in the form.

6. Analyze the value of the vads_sequence_number field:

VALUE	DESCRIPTION
0	Case of a cascading payment. Several payment methods were used to pay for the order.
	The list of payment methods used by the Buyer can be found in the vads_payment_seq field (in the JSON format).
	For more information, see chapter <i>Analyzing the result of a cascading payment</i> .
1	Order paid entirely with Chèque-Vacances Connect.

7. Analyze the value of the vads_card_brand field:

Its value allows to know if the order has been paid in full with Chèque-Vacances Connect or if a complementary payment is required.

VALUE	DESCRIPTION
MULTI	Case of a cascading payment. Several payment methods were used to pay for the order.
	The list of payment methods used by the Buyer can be found in the
	vads_payment_seq field (in the JSON format).
	For more information, see chapter Analyzing the result of a cascading
	payment.

VALUE	DESCRIPTION
CVCO	Order paid entirely with Chèque-Vacances Connect.

8. If the order was paid entirely with Chèque-Vacances Connect, retrieve the payment result transmitted in the vads_trans_status field.

Its value allows you to define the order status.

VALUE	DESCRIPTION
AUTHORISED	The transaction has been accepted and will be automatically captured at the bank on the expected date.
REFUSED	Refused
	Transaction is declined.
	See the chapter <i>Analyzing the result of the authorization request</i> on page 31 to obtain more information on the reason of payment rejection.
ABANDONED	Abandoned
	Payment abandoned by the buyer
	The transaction is visible in the Merchant Back Office.

9. If the order was paid using several payment methods, see the following chapter with the vads_payment_seq field analysis.

10.Proceed to order update.

Characteristics of a cascading payment:

When making a payment, the buyer pays a part of the purchase with Chèque-Vacances Connect and the remaining amount with another payment method.

The payment will consist of N sequences detailed in the **vads_payment_seq** field:

- All the transactions of a cascading payment are combined within a payment sequence.
- All the transactions of a payment sequence have the same transaction identifier, but a different sequence number.
- The number of the first transaction of the sequence is 1, the number of the second one is 2, etc.

How to identify a cascading payment?

In case of a cascading payment, the vads_card_brand field is set to MULTI.

Details of the vads_payment_seq field

All the transactions of a cascading payment are combined within a payment sequence.

All the transactions of a payment sequence have the same transaction identifier, but a different sequence number. The number of the first transaction of the sequence is 1, the number of the second one is 2, etc.

The **vads_payment_seq** field (JSON format) describes the cascading payment sequence. It contains the following elements:

- "trans_id": identifier of the transaction received in the vads_trans_id field of the payment form.
- "transactions": table of sequence transactions.

<u>Note</u>: canceled and rejected transactions are also displayed in the table.

Each transaction of the sequence contains the following elements:

Field name	Description
amount	Amount of the payment sequence.
operation_type	Debit transaction.
auth_number	Authorization number.
	Will not be returned if not applicable to the used payment method.
	Example: 949478
auth_result	Return code of the authorization request.
	 For a Chèque-Vacances Connect payment, see the value list in the following chapter.
	 For payment by bank card, see the value list of the vads_auth_result field in the Hosted Payment Page Implementation Guide.
	• For other payment methods, see the corresponding integration documentation.
capture_delay	Delay before the capture (in days).

Field name	Description				
	If the vads_capture_delay field is not transmitted in the payment request, the delay configured in shop settings will be applied. See the chapter <i>Technical information</i> on page 6 to check if any restrictions apply for this payment method				
card_brand	Code of the used payment method. Examples:				
	 CVCO, for a Chèque-Vacances Connect payment, 				
	• VISA for a payment with a Visa card,				
	• MASTERCARD for a payment with a Mast card.				
	• CB for a p	ayment with a CB card.			
	See Hosted Payment Page Implementation to view the full list of vads_card_brand field values.				
card_number	Payment method number or ID of the account used for the payment.				
expiry_month	Expiry month of the payment method. Will not be returned if not applicable to the used payment method.				
expiry_year	Expiry year of the payment method. Will not be returned if not applicable to the used payment method.				
payment_certificate	Payment certificate. Will not be returned if not applicable to the used payment method.				
contract_used	Contract number used for the payment.				
identifier	Token associated with a payment method. Will not be returned if not applicable to the used payment method.				
identifier_status	Only present if the requested action is a tok creation or update. Possible values:				
	Value	Description			
	CREATED	The authorization request has been accepted. The token (or UMR for SEPA payment) has been successfully created.			
	NOT_CREAT	The authorization request has been declined. The token (or UMR for SEPA payment) has not been created, and therefore cannot be viewed in the Merchant Back Office.			

Field name	Description					
	Value	Description				
	UPDATED	The token (or UMR for SEPA payment) has been successfully updated.				
	NOT_UPDA	The token (or UMR for SEPA payment) has not been updated.				
		The action has been abandoned by the buyer (debtor). The token (or UMR for SEPA payment) has not been created, and therefore cannot be viewed in the Merchant Back Office.				
presentation_date	Desired date format). Example: 20	Desired date of capture at the bank (in ISO-8601 Format). Example: 2020-04-08T14:56:48Z				
trans_id	Transaction	on number.				
ext_trans_id	Transaction Will not be r payment me	action reference on the acquirer side. ot be returned if not applicable to the used ent method.				
trans_uuid	Unique refe gateway af transaction. Guarantees	erence generated by the payment ter the creation of a payment that each transaction is unique.				
sequence_number	Sequence number.					
trans_status	Status of the transaction.

13.1. Canceling a transaction

This operation consists of canceling the transaction definitively. Partial cancellation (decreasing the amount) is not supported.

The **Cancel** operation is only available for the transactions that have not been captured.

- 1. In the **Transactions is progress** tab, right-click the transaction to be cancelled.
- 2. Select Cancel.
- 3. Confirm that you wish to definitively cancel the selected transaction.

The transaction status changes to Canceled.

13.2. Changing the capture date

- 1. Select the Transactions is progress tab.
- 2. Select a Chèque-Vacances Connect transaction.
- 3. Right-click the selected transaction.
- 4. Select Modify in the context menu.

A dialog box appears.

5. Modify the capture date according to your needs.

The obtained authorization is valid for 3 days. You cannot change the capture date after this period.

6. Click Validate to confirm the changes.

13.3. Making a refund

Partial refunds are not authorized.

The refunding of a Chèque-Vacances Connect transaction will result in an adjustment of the total amount on the buyer's ANCV account.

To refund a transaction

- 1. In the Captured transactions tab, select the transaction to refund.
- 2. Right-click the transaction to display the context menu.
- **3.** Select Making a refund.
- 4. Click Perform refund to confirm the refund.
