1. CHOOSING A TEST CARD

The payment gateway provides you with credit card numbers for making payment in test mode.

Different payment cases can be **simulated** using the test card numbers indicated in the tables below.

The merchant can test these payment cases in:

- payment by form,
- payment by Web Services,
- or MOTO payment.

To allow merchants to test the risk configuration defined on their store, test cards country **DINERS, VISA et MASTERCARD** corresponds to the company country, except for the following cards, for which country is GREENLAND (GRL):

- DINERS: **36000100000106**
